

Dear Dr. Khan,

I wanted to take a moment to thank you for your instruction and guidance in ENG 102 last semester. Having been out of the classroom as a student for over 30 years, the idea of going back and trying to remember how it all worked was quite overwhelming to me. But your instruction and advice and encouragement in class made the return so much smoother for me and gave me the boost of confidence I needed to continue on this journey. I truly believe the universe purposefully put me in your class to help me on my way toward my goal. Now, when I'm working on a project, at work, in class, or at home, and I get overwhelmed, I literally ask myself, "Okay, what did Dr. Khan say about taking things a little at a time and breaking down the project?". It has been a game changer, and I will forever carry your wisdom and advice with me, as well as pass it along to my girls.

Again thank you for your guidance. I hope you and your family are happy and healthy and I wish you all the best.

Sincerely grateful
